

John Tory
Mayor

April 29, 2019

The Honourable Doug Ford
Premier of Ontario
Legislative Building
Queen's Park
Toronto ON M7A 1A1

Dear Premier Ford,

Recently, the Province of Ontario announced changes to the funding formula for Toronto Public Health.

These changes were enacted without consultation, and are retroactive, beginning April 1, 2019 – two weeks before the City was informed of the cuts.

Based on the information our staff have received to date, the Medical Officer of Health and the City Manager have informed Council that the proposed cuts will result in a \$64 Million reduction in funding for the already approved 2019 budget and nearly \$1 billion over ten years. The first written communication we have received on these changes came on Friday, April 26th and that letter does not spell out the magnitude of these proposed cuts, nor does it explain why the City's position is not accurate.

Equally troublesome is the fact that the City of Toronto has been singled out for discriminatory treatment – while all other local public health units' budgets will be cost-shared 60% Province/40% City or 70% Province/30% City, the City of Toronto will be cost-shared at 50% Province/50% City. There has been no good reason provided as to why the country's largest city and economic engine will be expected to pay proportionally more for public health services largely mandated by the Province, especially when we know that a healthy city is a prosperous city.

If we want to end hallway healthcare, investing in public health – not cutting it back – will help us do that. Toronto's Medical Officer of Health has said that the best outcome of public health is often nothing – no outbreaks of communicable diseases, fewer people in hospitals

.../2

with preventable illnesses, and kids growing up better educated and better prepared for the labour market as a result of breakfast programs. This also often means that the true value of public health is difficult to measure or identify – I myself have learned more about its importance over the course of my time at City Hall.

A cut retroactive to April 1 of the Province's share of funding to Toronto Public Health's budget puts all services provided, or funded, by Toronto Public Health at risk, which is ultimately not in the best interests of a healthy and prosperous city.

Given the scale and retroactive nature of the cuts proposed by the Province, and the City's inability to make changes this year, I wanted to inform you of the front-line programs Toronto Public Health delivers in your riding – all of which are now under review and at risk of being severely curtailed or cancelled.

I have attached a preliminary list that includes most of the programs Public Health delivers in your riding of Etobicoke North, which in summary consists of:

- 32 child care programs which are inspected to reduce the risk of infectious diseases and other health risks;
- 36 breakfast programs;
- 18 school immunization programs;
- 2 dental clinics; and,
- 4 long term care centres with food inspections and infection control.

I know the residents of Etobicoke North depend on these services and that they keep our entire community healthy. As a result, I am asking you to reverse this decision, and restore funding to vital, front-line public health services in your ward.

I would be happy to discuss this issue at any time.

Sincerely,

Mayor John Tory
City of Toronto

Etobicoke North
