Voters Expressing Discontent with Both Liberals and NDP

Support for both the BC Liberals and NDP has softened since Mustel Group's last measure in August, with voters increasingly turning to the Green Party and BC Conservative Party.

If an election were held tomorrow, the BC Liberals would have the support of 35% of decided voters (down from 46% achieved in the election), the NDP would receive 43% of the vote, the Green Party would attract 15%, and the BC Conservatives would draw 5% of the vote.

Approval ratings of Premier Campbell have deteriorated further since the last measure whereas opinions continue to be divided with respect to the performance of the NDP leader.

The H1N1 has replaced to some extent the HST as one of the top issues of concern. The economy is of equal concern, but less so than earlier in the year, reflecting increased consumer confidence. The Olympics are emerging as an area of concern, almost equal to the level expressed for the environment and social issues.

Top Issue of Concern Facing B.C.
